PROFESSIONAL SUMMARY

Full Stack Laravel Developer with 1+ year of experience building scalable web applications and high-performance RESTful APIs using PHP, Laravel, and MySQL. Proven ability to optimize backend performance by reducing API response time through query optimization, indexing, and service-layer architecture, handling 4K+ users and 400+ daily requests. Experienced in designing secure authentication systems (JWT, Sanctum) and implementing Role-Based Access Control (RBAC), along with multi-tenant architecture for scalable business applications. Strong in developing and testing 150+ APIs using Postman and Swagger, ensuring reliable and efficient integrations for web and mobile platforms. Passionate about building clean, maintainable, and production-ready systems, with a focus on performance and scalable backend design.

TECHNICAL SKILLS

- **Backend Development:** PHP, Laravel (v12), RESTful API Design, API Versioning, OpenAPI (Swagger), Service Layer Architecture, Multi-Tenant Architecture
- **Frontend Development:** HTML5, CSS3, Tailwind CSS, JavaScript (ES6+), Alpine.js, React.js, Inertia.js
- **Database & Optimization:** MySQL, Eloquent ORM, Schema Design, Query Optimization, Indexing
- **Authentication & Security:** Laravel Sanctum, JWT, Laravel Passport, Role-Based Access Control (RBAC), Middleware
- **Tools & Technologies:** Git, GitHub, Postman, Swagger UI, VS Code, PhpStorm
- **Core Concepts:** MVC Architecture, Object-Oriented Programming (OOP), SOLID Principles, CRUD Operations, Exception Handling, Performance Optimization
- **Deployment & Hosting:** cPanel, Hostinger, InfinityFree, Domain & Subdomain Deployment

WORK EXPERIENCE

Full Stack Developer – Appstronaut IT Solution, Bangalore (Feb 2025 – Present)

- Developed and maintained scalable web applications using PHP, Laravel, and MySQL, ensuring high performance and clean architecture.
- Designed and implemented 200+ RESTful APIs for web and mobile integrations, improving system reliability and data flow.
- Optimized API response time through query optimization, indexing, and service-layer architecture, handling 4K+ users and 500+ daily requests.
- Implemented secure authentication and authorization using Laravel Sanctum, JWT, and Role-Based Access Control (RBAC).
- Built dynamic and responsive admin dashboards using React.js, Inertia.js, and Tailwind CSS.
- Designed efficient relational database schemas and optimized complex queries for large datasets (10K+ records).
- Integrated third-party APIs and external services to streamline business workflows and automation.
- Maintained API documentation using OpenAPI (Swagger) for better developer collaboration and testing.
- Collaborated with frontend and mobile teams to deliver end-to-end backend solutions.

Laravel Developer – Aaran Infotech, Tiruppur (Dec 2024 – Feb 2025)

- Developed backend modules and CRUD-based systems using PHP and Laravel.
- Designed and managed MySQL database schemas and ORM relationships for efficient data handling.
- Built RESTful APIs with validation, middleware, and secure authentication practices.
- Performed API testing using Postman and Swagger to ensure accurate request/response handling.
- Collaborated in a team environment using Git for version control and code management.

KEY PROJECTS

Accounting Software for Garments Manufacturing Units (Livewire, Laravel, php)

- Developed a full-featured accounting system including journal entries, ledgers, invoices, sales, purchases, expenses, and financial reporting.
- Designed normalized relational database schema and optimized transaction handling for accurate financial data processing.
- Built and integrated RESTful APIs for seamless backend and frontend communication.
- Collaborated in a Git-based team environment for version control and feature development.

Healthcare Management System (User App + Admin Panel) (Tailwind CSS, Alpine JS, Laravel, RBAC,)

- Built a healthcare platform with appointment scheduling, patient management, and service modules.
- Implemented Role-Based Access Control (RBAC) for doctors, staff, and patients with secure access management.
- Developed secure RESTful APIs for mobile and web integrations.
- Optimized backend workflows and database queries for improved performance and reliability.

Waqin Multi-Tenant Admin Panel (php, Laravel, Multi-Tenant Architecture, REST APIs)

- Developed a scalable multi-tenant system supporting gyms, boutiques, optical stores, and retail businesses.
- Implemented tenant-level data isolation and modular service architecture for multiple business domains.
- Designed and developed backend APIs for mobile application integration across tenants.
- Worked on service-layer architecture to maintain clean and scalable backend structure.

Smart Local Mart (S-Mart) – Q-Commerce Platform (React js + Inertia js , Laravel, MySQL)

- Built an e-commerce platform with user application and admin panel for grocery and essentials ordering.
- Implemented inventory management, cart system, and real-time order tracking features.
- Designed optimized database relationships to handle scalable product and order data.
- Developed APIs to support mobile-first user experience and fast order processing.

Mindhive – E-Learning Platform (Bootstrap, CSS, Laravel, Mysql)

- Developed course management, user enrollment, and admin dashboard modules.
- Designed backend logic for course access, user tracking, and content management.

ACHIEVEMENTS

- Delivered multiple production-ready backend systems across Accounting, Healthcare, E-commerce, and Multi-Tenant platforms, ensuring scalable and reliable application performance.
- Optimized API performance and database queries using indexing and structured backend logic, improving response time and handling large datasets efficiently.
- Designed and implemented secure authentication and authorization systems using JWT, Laravel Sanctum, and RBAC across multiple applications.
- Successfully developed and maintained 200+ RESTful APIs for web and mobile platforms, ensuring smooth integration and high system reliability.
- Built and contributed to a scalable multi-tenant platform supporting multiple business domains with efficient data isolation and modular architecture.

EDUCATION

- M.Sc. Computer Science — Bharathiar University, Tirupur (2021 – 2023)
- B.Sc. Information Technology — Bharathiar University, Tirupur (2018 – 2021)
